First Web Conference: Discussed Items

posted Nov 17, 2012, 2:53 PM by Ji-hoon Kim [updated Apr 27, 2013, 8:44 AM]

Thank you very much to all of you who have participated in the first Web Conference of the Project AGORA. All the working group leaders and key personnels joined the conversation and had a fruitful discussion on how to move the Project forward. Please have a look at the link below to see what has been discussed (*login required*).

<https://sites.google.com/site/projectagoraworkspace/home/collaboration-blog/screenshotofourfirstwebconference>

--

Once again, we thank you for all your effort in the Project AGORA.

Sincerely,
Joel Primack and Piero Madau for the Steering Committee

First Web Conference for Project AGORA

posted Nov 15, 2012, 3:47 AM by Ji-hoon Kim [updated Nov 17, 2012, 2:54 PM]

As was previously announced, the first Web Conference of the Project AGORA will be held at 9am PST/6pm CET on Nov.16 (Fri) via EVO. All the collaboration members are invited, while the leaders of the Working Group are highly encouraged to participate in the conversation. The discussion agenda will be circulated soon, so that the collaboration members have a clear view of what has been achieved so far, and what to expect in the web conference.

The EVO booking information has been sent to the project mailing list. EVO is a multi-user video chat (eve.caltech.edu), and we recommend the participants to register ahead of time and see if the program runs well using the EVO TEST channel. Participants can call in using the international numbers below, or via Skype. If you run into problems, please contact evosupport@vrvs.org.

We hope to see you on Friday!

Sincerely,
Joel Primack and Piero Madau for the Steering Committee

Project Name, Workspace Launch, and Action Items

posted Oct 6, 2012, 4:51 PM by Ji-hoon Kim [updated Nov 17, 2012, 2:56 PM]

Welcome to Project AGORA! AGORA was submitted by Javiera Guedes at ETH Zurich, and garnered 58% of the votes in the final round (21 votes out of 36). AGORA stands for Assembling Galaxies Of Resolved Anatomy, and of course came from an ancient Greek word Ἀγορά meaning a gathering place in ancient Greek city states.

We now move to the science business, and ask you to please fulfill the following action items.

----- ACTION ITEMS:

1. Every member who has signed up by now can access the Collaboration Workspace by clicking the "Workspace" tab on the project webpage and then sign in with Gmail ID. A registered member has a full read/write privilege. If you need an access but have not signed up yet, please send us an email.

2. To (tentative) leaders of Working Groups, whose names are now posted at "Project Details" page:

We ask you to fulfill the following items.

(1) First, start organizing your working group and check which codes are being represented. Recruit more people if needed. Up-to-date member lists of each working group can be found at "Project Details" page. You can also find the email addresses of the project participants at the "Useful Info" section of the Workspace.

(2) Make sure to have your leadership role confirmed with the group members, and let us know. FYI, the authorship policy for the project papers is in the making and soon to be announced.

(3) Build a roadmap of the working group. Think about science questions, and circulate an agenda of proposed simulations and analysis in your group. Launch a sub-project or a spin-off project if necessary. Please be inclusive of all group members at every step of the way.

(4) Encourage the group members to share their progress in the Workspace. Be transparent about your progress so it can be clearly understood by the members outside the group, or by new members of the collaboration. Maintain two levels of description, namely: [A] a succinct summary of the current project state/results of a working group, primarily under the responsibility of the group leader, and [B] a blog-like collection of more specific information as the project moves ahead. Other groups will always want to know [A], but may occasionally use [B] in terms of results/analysis/technical issues between projects.

(5) Thus far, most of the actions have been in WG I - III, and some in WG V - VI. We ask these working groups to share their products on Workspace at the earliest convenience, so that other science-focused groups can orient themselves more easily. You may also use this mailing list or the Collaboration Blog to advertise your achievement.

FUTURE TIMELINE:

1. By the first web conference on Nov.16, we expect each working group has completed at least some of the agenda above.

2. The flagship paper(s) of Project AGORA to introduce the rationale and structure of the project is expected later this year, with a draft hopefully ready by Nov.16. First science papers by WG V - VI, or others are expected in the summer of 2013.

--

Please do not hesitate to talk to us if you have any question or concern. Thank you very much.

Sincerely,

Piero Madau, Lucio Mayer, Joel Primack, and Romain Teyssier for the SOC

Project Details Updated

posted Aug 25, 2012, 12:06 AM by Ji-hoon Kim [[updated Nov 17, 2012, 2:55 PM](#)]

Thank you for your participation in the Santa Cruz High-resolution Galaxy Simulation Comparison Project. During its Starting Workshop (Aug. 17-19, 2012) over 40 participants representing seven different astrophysics codes launched one of the largest comparison projects yet. We had a truly exciting time to discuss what needs to be done to move the field of numerical galaxy formation forward. We now ask you to please fulfill the following action items.

ACTION ITEMS:

1. Read the "Project Details" webpage *carefully*, which summarizes the consensus made during the workshop and explains the working groups formed. We thank all the people who have contributed to this summary.

2. Sign up in the working group that interests you. The sign-up form can be found at the bottom of the same webpage.

--

As soon as the project has a proper name and Google IDs from collaboration members are collected, the project website will be relaunched with a new name and a newly-designed workspace. Please forward this message to your colleagues and anyone potentially interested as we always welcome more participation.

Thank you very much.

Sincerely,

Joel Primack and Piero Madau for the SOC

Starting Workshop Information

posted Jun 13, 2012, 4:36 AM by Ji-hoon Kim [updated Nov 17, 2012, 2:53 PM]

The information about the 1st workshop at UCSC (Aug. 17-19, 2012) has been updated. Participants of the workshop may find useful information on the preliminary agenda, venue, travel, and lodging options in the "Starting Workshop" tab. We all are very eager to see you in Santa Cruz! Don't hesitate to send questions if any.

Announcement & Registration for the 1st Workshop

posted May 6, 2012, 5:42 AM by Ji-hoon Kim [updated Nov 17, 2012, 2:55 PM]

We are pleased to announce that the 1st workshop to launch the Santa Cruz High-resolution Galaxy Simulation Comparison Project will be held 17-19 August 2012 at the University of California, Santa Cruz. This workshop is sponsored by the University of California High-Performance AstroComputing Center (UC-HiPACC).

LOGISTICS AND REGISTRATION:

The Department of Astronomy and Astrophysics at UC Santa Cruz will host the workshop in Santa Cruz, CA. There will be no registration fee, and we are optimistic about some funding opportunities as well which will likely cover a limited number of grants for travel and local expenses. If you wish to be considered for funding for your travel, please send an email directly to Prof. Joel Primack at joel(at)ucsc.edu with details including expected costs and your other sources of funding.

Please fill out the registration form (6. Join Us on this website) if you are interested in attending the workshop. More information about the project and the workshop is available in the same website.

SANTA CRUZ GALAXY WORKSHOP 2012:

This is a separate summer workshop held annually at UC Santa Cruz. It is planned for the week of 13-17 August 2012, and will overlap with our workshop on Friday 17. If you want to be a part of Santa Cruz Galaxy Workshop 2012, please send an email to Avishai Dekel at dekel(at)phys.huji.ac.il and cc Joel Primack at joel(at)ucsc.edu.

FURTHER INFORMATION:

Please keep an eye on the project website for updated information and do not hesitate to contact us if you have any questions (santacruzgalaxy(at)gmail.com). Please also forward this message to your colleagues and anyone potentially interested.

Thank you very much.

Sincerely,
Joel Primack and Piero Madau for the SOC

New website launched.

posted Feb 15, 2012, 9:20 AM by Ji-hoon Kim [updated Nov 17, 2012, 2:55 PM]

This webpage will act as a hub for the collaborative effort within the Santa Cruz High-resolution Galaxy Simulation Comparison Project, a place where people can work together and exchange ideas during the project. This webpage was first created on Feb. 14, 2012 using the Google Sites interface by Ji-hoon Kim.
