script to convert ASCII data to GADGET ICs (type 1)

posted Aug 18, 2013, 3:36 PM by Robert Thompson

Hi everyone, I just cooked up a simple python script to take in the ASCII data Oscar has so kindly provided and convert it to a GADGET IC file (type 1 binary). You'll need both attached files, but before you run createIC.py make sure you edit the DIR parameter to point to your .dat file directory, Let me know if you run into any problems or have any questions!
