- Task: Develop a pipeline for common data analysis, write a research article introducing such analysis
- Description: This working group will focus on defining repeatable, quantitative and physically-meaningful comparisons of simulation results. Additionally, tools will be identified and developed to support making these comparisons. [\[authored by Matthew Turk\]](#)
- See the [page](#) for Interactive Visualization via yt and IPython notebook to learn about how the technology is being developed for the use in the AGORA Project.
